

Hydraulic dock levellers with hinged lip

InterDock™ L330i and L350i come with a hinged lip and have established themselves as the basic version in loading technology. With the integrated **Inter HA** control, dock levellers are user friendly and safe to operate. Like all **Interdoor** products, **InterDock™** L330i and L350i also cater for CO₂ reduction and operating cost savings through optimised energy requirements. The stable steel construction remains unchanged. NCI technology provides a decisive competitive edge over all other dock levellers available with a hinged lip.

Characteristics	L 330i	L 350i
Nominal load according to EN 1398	60 kN	100 kN
Telescopic lip lengths (mm)	400/500	400
Nominal lengths (mm)	2000, 2500, 3000, 3500, 4000, 4500	
Nominal widths (mm)	1750, 2000, 2250, 2400	
Pit Depths (mm)		
600	up to 3000 (NL)	up to 3000 (NL)
700	up to 3000 (NL)	up to 3000 (NL)
800	at 3500 (NL)	at 3500 (NL)
900	from 4000 (NL)	from 4000 (NL)
