

Dock shelters with ISO foam core

The **InterSeal™ S 450** comes with a built in ISO foam “push-in protection” core offering protection against draughts, rain and wind. It also provides perfect sealing between lorry and building and protect against energy loss and possible damage to the cargo.

The side parts have neither arms, handlebars, hinges or leverage in the side parts – the door seals are practically “indestructible”.

The ISO foam core side parts also move to the side without causing any damage in the case of staggered or oblique starting up vehicles absolutely regardless of the roof part.

InterSeal	S 450
Width (NB)	3450
Height (NH)	3400
Depth (NT)	600
Width side curtain (SP)	600
Height top curtain (OP)	1000
